SUMMARY

- Senior Frontend Engineer with **7 years** of experience building scalable, high-performance web and mobile applications using React.js, Next.js, React Native, and the MERN stack, with a strong focus on TypeScript, Redux, Apollo, and secure auth (JWT, AES/RSA, UAE PASS)
- Delivered real-time features using WebSockets, designed reusable component libraries with Tailwind CSS, integrated REST and GraphQL APIs, and led teams through code reviews, performance tuning, CI/CD deployment (Vercel, Docker), and testing with Jest.

WORK EXPERIENCE

Sr Frontend Engineer

📍 Dubai, UAE (Remote)

Consultant and Developer

📅 June 2025 – Present

Concurrently managing the architecture and delivery of scalable web and mobile applications for 2–3 distinct client projects.

- Architecting modular frontend systems using React.js, Next.js, React Native, and TypeScript with reusable component libraries and scalable state management.
- Engineering automated CI/CD pipelines using GitHub Actions and Fastlane for seamless web deployments and mobile app store releases.
- Designing high-performance data layers integrating REST and GraphQL APIs with optimized caching and data validation strategies.
- Implementing secure authentication flows and frontend security best practices across modern web and mobile platforms.
- Leading frontend architecture guidance, rigorous code reviews, and performance optimization to ensure maintainable codebases.
- Collaborating with product managers, designers, and backend teams to deliver production-ready, end-to-end user flows.

Frontend Engineer

DU Telecom – Linnk Group

📍 Dubai, UAE

📅 February 2024 – April 2025

- Worked as frontend development for a large-scale enterprise platform across Web, iOS, and Android using React.js, Next.js, and React Native, supporting over 10 million monthly users. The platform enabled digital onboarding and eSIM activation, streamlining telecom services for both individual and business customers across the UAE.
- Enhanced app performance by **35%** through frontend optimization & add **UAE PASS integration**, reducing onboarding time from **15 to 5 minutes**.
- Streamlined GraphQL data handling using **Apollo Client**, improving responsiveness and user experience.
- Mentored **4 junior developers**, enforcing best practices via **GitLab code reviews** and promoting clean, maintainable code.
- Applied **SOLID principles**, **TDD**, and **Jest** for unit/integration testing, reducing production bugs by **45%**.

KEY ACHIEVEMENTS

- Performance & Scalability:** Optimized high-traffic apps with React.js/Next.js (1M+ users); improved load speed by 50% using TypeScript, lazy loading, and state management.
- Security & Reliability:** Implemented JWT, AES/RSA encryption, and UAE PASS login; Programmed encrypted chat systems and ensured XSS protection through sanitization.
- UI & Reusability:** Delivered clean, responsive UIs with Tailwind CSS and shared component libraries; supported multi-brand theming with consistent design systems.
- Leadership & Collaboration:** Mentored junior devs, led frontend features, and drove code quality through Git reviews, agile workflows, and architectural input.

SKILLS

- React.js / Next.js / React Native
- TypeScript / JavaScript
- Redux / State Management
- GraphQL / REST APIs
- Tailwind CSS / HTML / CSS
- CI/CD & Git (GitHub/GitLab)
- Jest / react-testing-library
- Team Collaboration & Communication

EDUCATION

B.S. Software Engineering

Iqra University

📍 Karachi

📅 2017 – 2021

CERTIFICATES

Certified JavaScript Programming

Saylani

June 2019

CPD Workshop – App Development

Professional Engineering Body (PEB)

March 2018

Senior Frontend Developer

Modsoft Technology

📍 Dubai, UAE

📅 May 2023 - February 2024

- Led the design, development, and deployment of multiple high-impact applications using React and Next, based on performance, security, and scalability.
- Developed a **secure real-time messaging platform** using **React.js**, **Redux**, **custom WebSocket modules**, and **background services**, increasing feature usage by **40%** and improving user retention.
- Executed **end-to-end encryption (AES-256, RSA)** and **JWT authentication** for secure communication supporting **100K+ users**.
- **Dockerized** the full stack and set up **CI/CD workflows** to automate testing and streamline deployments.
- Built a **high-performance marketing site** with **React.js**, **HTML5** and **Tailwind CSS** reducing bundle size by **40%** and improving **Time to Interactive (TTI)**.
- Created a **background service in React Native** with native module integration to securely track **OTP and SMS messages**.
- Served as **technical architect**, designing **scalable**, performance-focused systems across web and mobile platforms.

SOFT SKILLS

- Clear verbal communication for cross-functional collaboration and client interaction
- Analytical problem-solving applied to debugging, optimization, and architecture decisions
- Team-oriented approach with experience mentoring developers and leading feature rollouts
- Adaptability in fast-paced agile environments with shifting priorities and deadlines
- Proven time and project management, meeting sprint goals and shipping on schedule

Frontend Developer

TNC IT Group

📍 Dubai, UAE

📅 July -2022 – March 2023

- Led multiple **web and mobile projects** in a high-growth **fintech/blockchain** startup environment.
- Developed **3+ high-performance apps** using **React Native**, **React.js**, **TypeScript**, and **Redux**, serving over **150K+ users**.
- Migrated core features from **Kotlin/Swift to React Native**, reducing codebase complexity by **40%** and speeding up feature delivery.
- Handled **crypto wallet management** modules using **blockchain REST APIs**, enabling secure transactions for over **50K+ active wallets**.
- Transformed a **survey-based rewards app** with **crypto incentives**, increasing user engagement by **60%** in the first 3 months.
- Designed reusable **component architecture**, improving development speed by **30%** and reducing code duplication.

Associate Software Developer

Cubix

📍 Karachi, Pakistan

📅 May 2021 – March 2022

- Published **10+ React Native apps** integrated with **Firebase** and **REST APIs**, improving performance and cross-platform scalability.
- Added **Stripe**, **Tap**, **location services**, and **live chat** to enhance in-app functionality and user engagement.
- Built a **shared design system** reused across **5 apps**, reducing front-end development time by **30%**.
- Implemented **AR features** using **ViroReact**, increasing product interaction and visualization engagement by **3x**.

Fullstack MERN Developer

Web-ITech

📍 Karachi, Pakistan

📅 July 2020 – May 2021

- Deployed **scalable full-stack applications** using the **MERN stack**, supporting **10,000+ monthly users** efficiently.
- Improved **database query performance by 40%** through indexing and optimization in **MongoDB** and **MySQL**.
- Implemented **JWT-based authentication** and handled **1M+ API calls/month** via optimized **RESTful endpoints**.
- Increased overall speed by **50%** frontend enhancements like **lazy loading**, **asset compression**, & **efficient state management**.

Graphic Designer & Web Developer

E2B Solutions & SteelBis

📍 Karachi, Pakistan

📅 November 2016 – July 2020

- Built smartphones **responsive React.js websites** integrated with **Bitrix24 CRM**, automating lead workflows and reducing support tickets by **40%**, which led to a **35% increase in lead volume** within 3 months.
- Designed **UI/UX mockups & marketing assets** using **Adobe XD**, **Adobe Illustrator**, and **Adobe Photoshop**, improving design approval rates by **50**
- Collaborated with **cross-functional teams** to maintain a **consistent user experience**, decreasing frontend bugs by **30%** during launch phases.
